EXPERIENCE

Lab Instructor

Charlotte, NC

University of North Carolina at Charlotte

August 2025 – Present

- Provide technical support and local environment configuration assistance for a user base of 600+ students.
- Lead weekly staff syncs to mentor assistants and gather feedback for continuous process improvement.
- Debug syntax and logic errors for 120+ students by analyzing code flow and stack traces in real-time.
- Coordinate updates and grading SLAs between faculty and instructional staff for consistent delivery.

Scouting America Eagle Scout & Lead Advisor

Charlotte, NC

Troop and Crew 167

April 2008 – Present

- Directed a \$2,000 infrastructure project, managing architectural drafting, procurement, and 15 volunteers.
- Navigated multi-stakeholder approval workflows with district boards to authorize complex project plans.
- Promote risk assessment discussions to help youth leadership identify and preempt operational issues.
- Oversee operations and safety compliance to ensure adherence to organizational training standards.

Course Lead (Senior Patrol Leader)

Charlotte, NC

National Youth Leadership Training

September 2021 – June 2022

- Orchestrated recruitment and onboarding for a 20-person staff team to deliver the leadership curriculum.
- Facilitated daily "Start-Stop-Continue" retrospectives to drive continuous improvement of operations.
- Coordinated bi-weekly prep scheduling via Google Workspace to align with national compliance.
- Developed and maintained 15+ presentation assets to modernize the course delivery platform.

PROJECTS

bachelder.me | Next.js, TypeScript, Cloudflare, GitHub Actions

September 2025 – Present

- Architected a modular component system using TypeScript and React to enforce code reusability and type safety.
- Configured Cloudflare DNS and CDN infrastructure, including custom email routing for domain administration.
- Optimized frontend performance using Next.js image and link modules to ensure efficient content delivery.
- Deployed a static site generated (SSG) web application via automated GitHub Actions CI/CD pipelines.

m62.bachelder.me | Docker, GitHub Actions, Nginx, DigitalOcean, MongoDB

November 2025 – January 2026

- Engineered a microservices network using multi-stage Docker builds to ensure efficient container performance.
- Automated deployments and code quality testing on DigitalOcean via custom GitHub Actions CI/CD pipelines.
- Orchestrated automated MongoDB database initialization and seeding using custom shell provisioning scripts.
- Secured internal API endpoints by enforcing OAuth2 and JWT authentication protocols for communication.

[Restaurant Database API](#) | Python, MySQL, FastAPI, SQLAlchemy, Git

January 2025 – May 2025

- Modeled relational database tables with SQLAlchemy and enforced validation using Pydantic schemas.
- Translated 10 customer-requested requirements into 17 features and 8 structured endpoints.
- Implemented a backend API with CRUD endpoints across 8 relational database models.
- Collaborated in a Scrum-based workflow and maintained version control with GitHub.
